

Temporary closure of Murray 1 Visitors' Centre

Snowy Hydro has commenced major overhaul works at Murray 1 Power Station as part of our \$400 million Scheme Modernisation Program.

As a result, we will be temporarily closing the Murray 1 Visitors' Centre (located at the far end of the station) from the 2016 June long weekend.

Snowy Hydro will create an alternate visitor experience for our valued customers at our Murray 2 Power Station located at the end of Murray 2 Power Station Road. We hope this will be up and running as soon as possible. To keep up to date with the progress please call 1800 623 776 to speak to one of our friendly customer service officers about more details on the experiences and services that will be on offer.

Safety is very important at Snowy Hydro, for both our employees and the communities we operate in. We would like to thank the community and the visiting public for their patience while we endeavour to create a unique visitor experience at Murray 2 during the refurbishment works.
